

# Equipment Range

## AV Birch 3500m Table Press

The Birch 3500M Table Press is considered to be the most versatile on the market today.

Being simple to operate ensures fast and accurate roof truss set up times.

35 tonne pressing capacity and tables lengths up to 40 metres are available.

## AV Birch Apex Table Press

The AV Birch Apex Table Press is the latest introduction to the marketplace.

Powered lifters enable the truss to be removed from the table with ease.

A Split Table allows for easy access and comfortable waist height set-ups.

## Hundegger SC1 Saw

Full CNC cutting with complete flexibility and precision. Compound cutting, milling for birdsmouths, drilling and marking capability.

Fully enclosed saw blade conforms to latest HSE directives to reduce airborne dust particles.

Automated in-feed conveyor and self-storing deck to give efficient one man operation.

## AV Birch Joist Press

Single operator loading and pressing gives a significant reduction in labour costs.

Adjustable internal and external clamping allows fast, accurate and economical manufacture of the *easi-joist* floor system.

Available in any length.

**All your equipment needs, all under one roof**

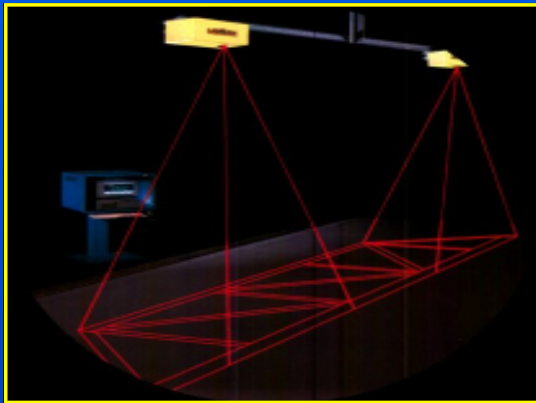

## De Pauw Quadri-Cut Saw

The De Pauw Quadri-Cut Saw is the markets leading 4 blade saw and has full CNC capacity working directly from design data for accuracy and speed.

## Randek CNC Saw

The Randek single blade Saw has full CNC capacity working directly from design data for accuracy and speed.

## Laser Setting System

The Laser Setting System can reduce truss set-up times by up to 50% It will also improve your manufacturing quality and accuracy.

## AV BirchSplice Press

The self contained hydraulic unit has a pneumatically controlled head for forward and reverse movement of the press head, which enables quick throughput of timber.

## Material Handling

Truss Handling

Stacking for Saw Lines

Truss Movement
